TITLE:

Serial Library System Update
and Reporting

PURPOSE OF SYSTEM:

To maintain records of the Biological Laboratory Technical Libraries scientific and technical journals. These records have been automated to facilitate the production of receiving reports, accession lists, routing lists and management review of subscription contracts.

REQUESTED BY: Biological Lab Technical Library

ANALYST: D.E. Westfall, Wolf Research and Development Corporation

PROGRAMMER: D.E. Westfall, Wolf Research and Development Corporation

DOCUMENTED BY: D.E. Westfall, Wolf Research and Development Corporation

SOURCE LANGUAGE: COBOL

COMPUTER: CDC 3150

REQUIRED COMPONENTS: READER, PUNCH, PRINTER, 2 Magnetic Tapes, 2 Disk Drives

OBJECT TIME STORAGE REQUIREMENTS: Main Memory:

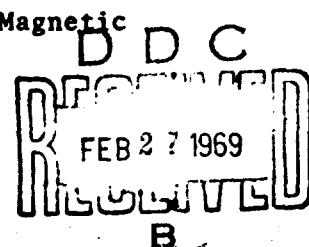

Secondary:

SECURITY CLASSIFICATION:

Program: Unclassified
Data: Unclassified

This document has been approved
for public release and sale; its
distribution is unlimited

Best Available Copy

OBJECTIVE:

To maintain records of the scientific and technical journals in the Biological Lab Technical Library for production of routing slips, accession list, subscription contract review.

SYSTEM DESCRIPTION:

Records are updated (additions, deletions, and changes) on a monthly basis by use of receipt cards, and route cards received from the Library. The Update Program produces the current month accessions, first copy list, route list and expected issue cards to be recycled through the system during the next update cycle.

Special management review lists for contract renewal are produced as required.

The following section (Page 3 through 6) describes the methods and input cards to be used by the Journal Control Center of the Technical Library in preparing transaction cards to create and update the Publication Master, Accession and Route file for the Serial Library System and to produce the required reports and special listings.

General

The system inputs for update and normal processing as shown in Attachment 1 are:

- a. Date control card for program SLS01.
- b. Title card (1 in Col. 80)
- c. Vendor information/address cards (2 and 3 in Col. 80)
- d. Publisher information card (4 in Col. 80)
- e. Cross reference cards (5 and 6 in Col. 80)
- f. Route file information card (9 in Col. 80)
- g. Accession delete card (7 in Col. 80)

The special data control cards for accession lists and the suppliers lists are shown in Attachments 2 through 5.

CREATE PROCEDURES

Publication Master File

The minimum data required to create a record for a new journal on the publication Master File is the title card (1 in Col. 80) with following fields punched:

- a. Title code in Col. 1-5
- b. Title of journal in Col. 6-58
- c. Volume number in Col. 62-65
- d. Issue number in Col. 66-69

If available all pertinent information should be loaded at the time the record is created. If not available the record can be updated during any succeeding processing cycle.

Route File

To create a record on the route-file for the required routing of any journal prepare route information card (9 in Col. 80) for each recipient of a specified copy of a journal.

Accession File

The accession file is created by the 1 in Col. 80 card used to create the publication master file. A new record is created for each volume/issue number of a journal as it is received into the system.

UPDATE ACTIONS

Publication Master File

All data on the Master File can be changed. To update and/or correct any data field punch the required data in the appropriate card columns plus the title code in Col. 1-5 and the card code in Col. 80.

Correcting a volume/issue number that is too high requires deletion and a creation. Both of these actions can take place during the same update cycle.

Route File

To correct or change a record in the Route File requires a 9 card with data fields filled in.

Accession File

The Accession File cannot be corrected except through an accession delete and a master record update.

DELETION ACTION

Publication Master File

To delete a record from the Publication Master File requires a 1 card with the title code of the record to be deleted punched in Col. 1-5, the word DELETE in Col. 6-11 and a 1 in Col. 80.

Route File

A 9 card with the title code in Col. 1-5, the sequence number in Col. 7-9 and DELETE in Col. 10-16 will delete a record from the route file.

Accession File

A 7 card with the title code in Col. 1-5, the volume/issue number of the first record to be deleted in Col. 6-13 and the last record in Col. 16-23 will delete records from the Accession File.

ACCESSION LISTS

To produce the First/Last Accession list requires the control card shown in Attachment 2.

To produce the Cumulative Accession List use the control card shown in Attachment 3.

SPECIAL MANAGEMENT REVIEW LISTS

To produce the special management review lists requires the control cards as shown in Attachment 4 and 5. For each title control card (Attachment 4) there can be any number of vendor control cards (Attachment 5).

**COBOL NAMES USED IN SYSTEM
TO MANIPULATE DATA IN THE
PUBLICATION-MASTER-FILE RECORD**

<u>Location</u>	<u>Size</u>	<u>Type</u>	<u>Source</u>	<u>Data Name</u>	<u>COBOL Name</u>
1-5	5	N	1	Title Code	TTL
6-58	53	A/N	1	Title of Journal	TITLE
59	1	N	1	First Issue Indicator	IST-ISS
60-61	2	N	1	Number of Copies	NR-CY
62-65	4	N	1	Volume Number	VOL-NR
66-69	4	N	1	Issue Number	ISS-NR
70	1	N	1	Continuous Issue Indicator	CONT-ISS
71-74	4	N	1	Frequency	FREQ
75-79	5	A/N	1	Location Filed	LOC
80-83	4	N	3	Number of Issues in a Volume	NR-IN-VOL
85-87	4	N	3	Number of Issues Received	ISS-RECD
88-131	44	A/N	2	Vendor	VEND
132-161	30	A/N	2	Street Address	ADRS-2
162-191	30	A/N	3	City & State Address	ADRS-3
192-221	30	A/N	3	Country Address	ADRS-4
222	1	A/N	3	Language of Publication	LANG
223	1	A/N	3	Foreign Publication	FORGN
224	1	A/N	3	Pay in Advance Indicator	AD-PAY
225-244	20	A/N	4	Publisher	PUB
245-259	15	A/N	4	City of Publication	CTY-PUB
260-279	20	A/N	4	Purchase Order Number	PUR-ORD-NR
280-284	5	N	4	Cost	COST
285-288	4	N	4	Renewal Date	REN-DT
289-298	10	A/N	4	Subject Code	SUB
299-368	70	A/N	5	Cross Reference	X-REF
369-433	70	A/N	6	Issue Holdings	ISS-HLD
439-446	8	N Comp		Expected Volume Issue	EXP-VOL-ISS

The above COBOL names are used as the basic names for all records. Prefixs/Suffixs below indicate which record or work area is being referred to--

MST	PUB-MST-REC
O	Old MASTER as read
N	New MASTER as written
ACC	ACCESSION Record as read
RT	ROUT-RECORD as read
A-T	1 cards in accession tank
1, 2, 3, 4, 5, 6, 7	References Card
9CD	References 9 card
R-T	Route tank

PROGRAM TITLE: Serial Library Update (SLS01)

PROGRAM OBJECTIVE:

To maintain current records of scientific and technical journals, which reflect for each journal on file in the Technical Library the following data:

1. Title
2. Number of copies
3. Volume/issue number
4. Cost per copy per year (run of subscription)
5. Supplier
6. History of all journals received.
7. Route information
8. Final depository location

PROGRAM DESCRIPTION:

1. The Master Publication and Route Files are loaded to disk from tape. The first issue (Master Publication File) is set to spaces at this time. Date card is read edited and stored. The Accession File is processed from tape with the current month receipt indicator being removed as the file is read.

2. Input cards are sequence checked as read. If the sequence is low, the card with a sequence note is printed, and another card is read. If sequence is high the control goes to the update process.
3. For an equal sequence or first card in a group, the type is determined and the card is stored. The following edits are made (if a field is in error the card is printed with '*'s over the field in error and moves spaces to that field in memory).

1 card = number of copies, volume/issue number.
If volume/issue is in error the card is rejected. If DELETE is punched in the Title field a delete switch is set.

3 card = number of issues per volume and number of issued received.

4 card = cost of subscription

New record = at least a 1 card is required to create a new publication record, if not, list other cards.

4. Expected issue cards are cut for the first time each journal processed, depending on the first 2 characters of the frequency code.

80 Weekly	8
81 Bi-Weekly	4
82 Semi-Monthly	4
All others	2

During succeeding processings, one expected issue card will be cut for each receipt.

When more than one card is cut the volume/issue number will be adjusted accordingly.

5. All valid 1 cards will be loaded to the accession file. An indicator will be set to reflect the current months processing.

A 7 card (accession delete) is required to delete records from the Accession Tape. A single card will cause from one to all issues of any journal to be deleted from the file.

6. A 9 card (route) will cause the route file to be updated. If DELETE is punched in the name field, the corresponding title code/sequence number record will be deleted.

An asterisk (*) in Col. 6 indicates the first receipt of a copy of the journal. There will be a maximum of five names per route slip. The same number of route slips will be printed per copy as expected issues cards punched.

7. At end of the job, while dumping the updated files to tape, produce the first copy list from the Master File if first copy field is *. List all route records for Audit. The current months accessions will be listed if current month field in the accession tape is A.

JC-SLS01**

I. CONTROL INFORMATION

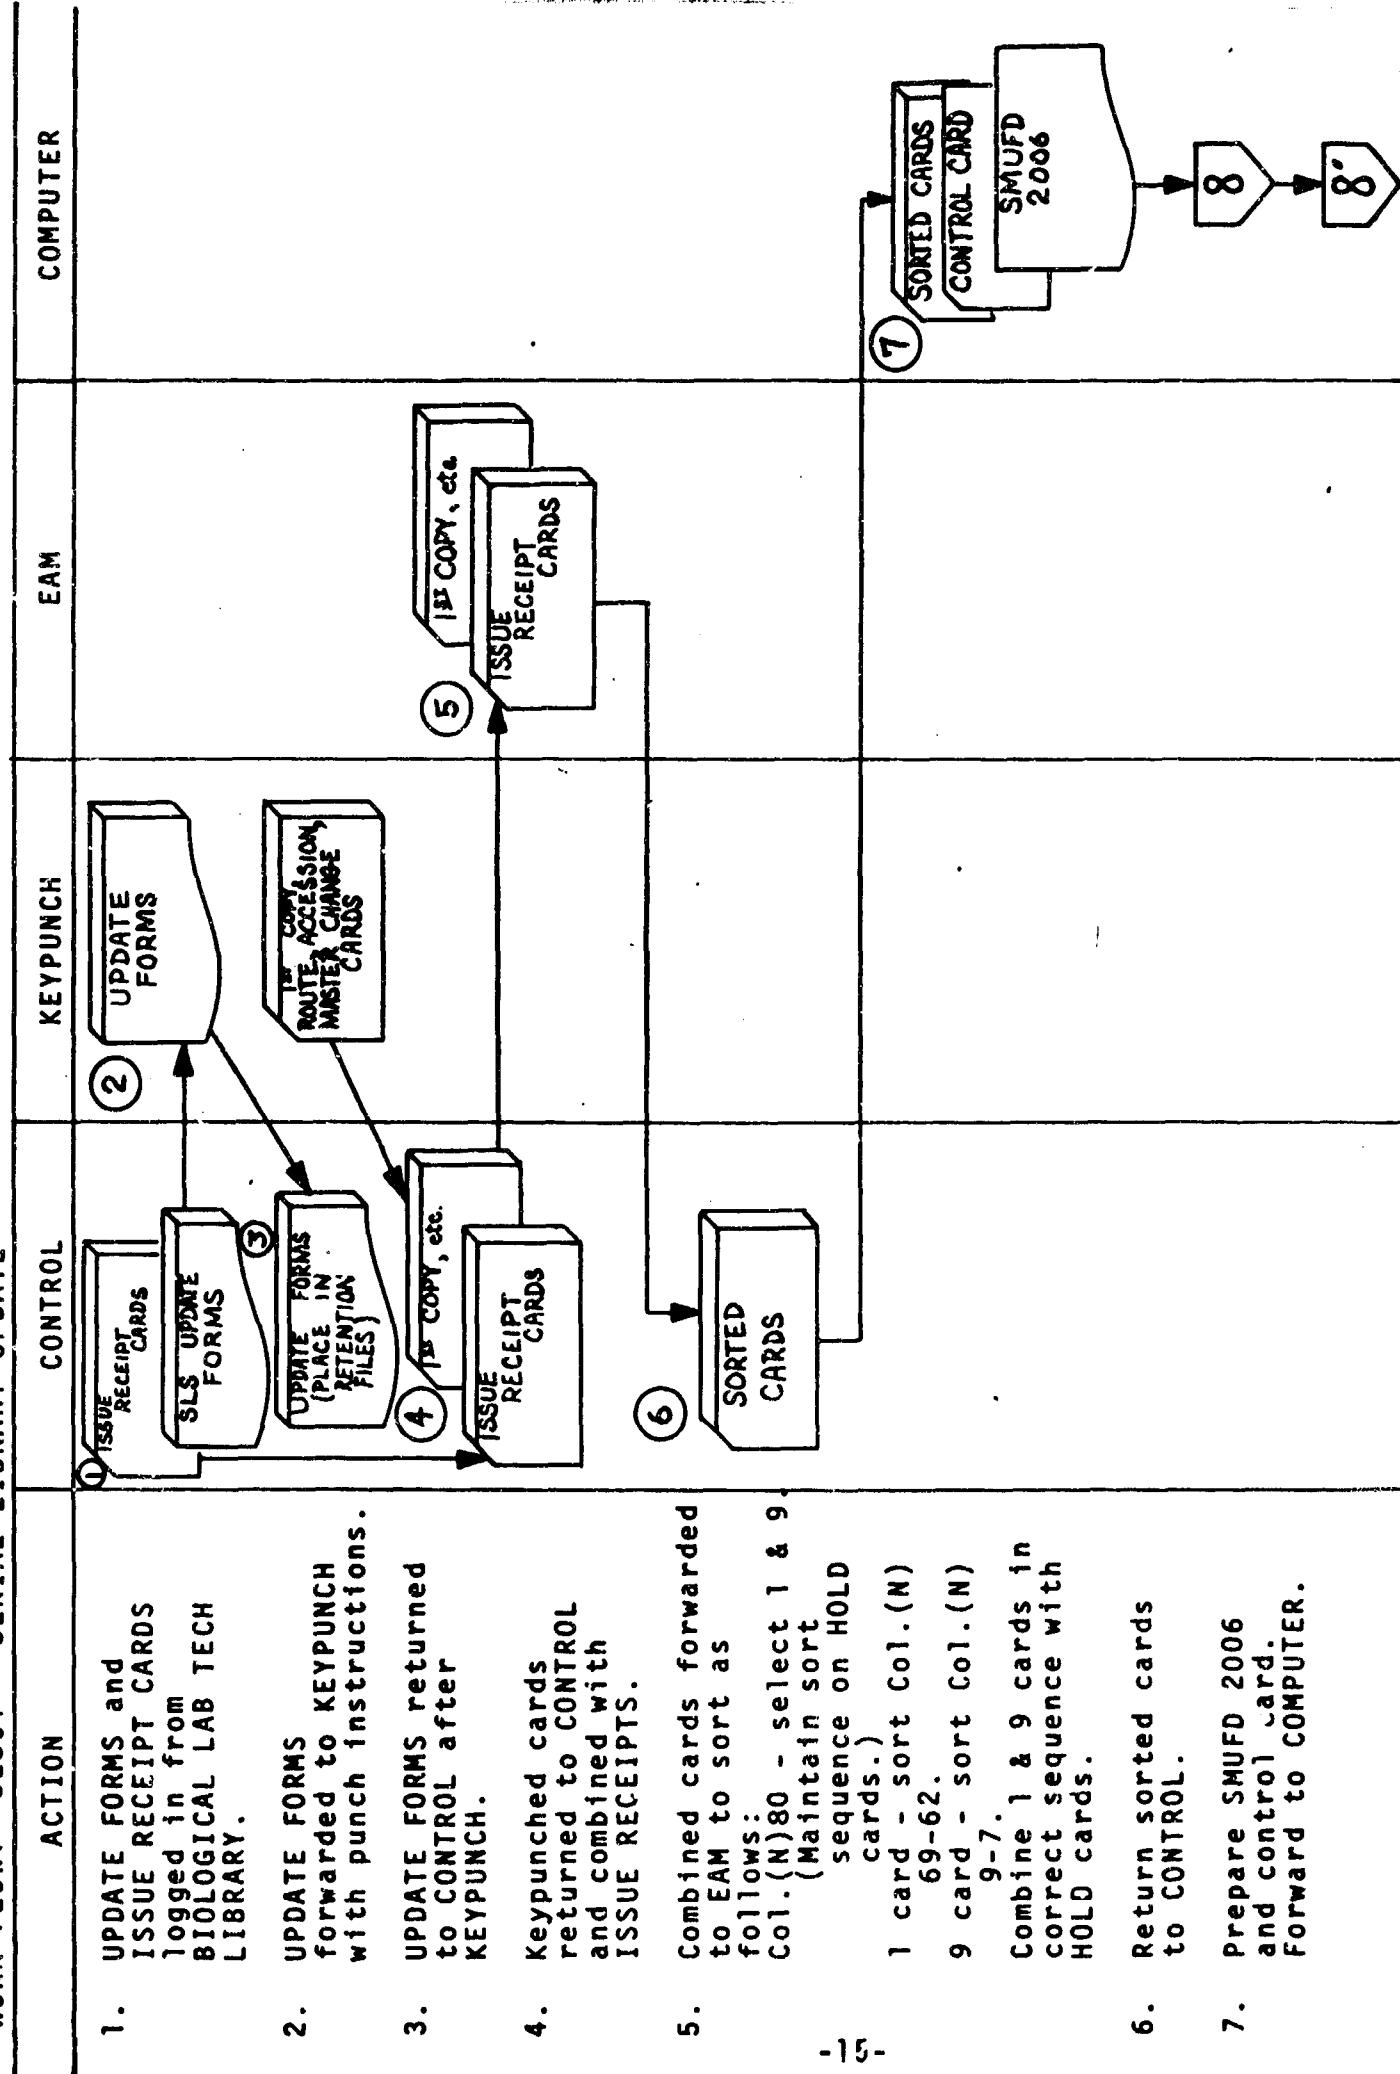

- A. Usual Source of Data:** Fort Detrick Technical Library
- B. Point of Contact:** Journal Control Room
- C. Data Transmittal Form:** Expected issue DD 1530 Transcript
- D. Frequency of Use:** Monthly
- E. Due In:**
 - 1. Day = 20th of month or first work-day thereafter
 - 2. Time = 1000 hours
- F. Due Out:**
 - 1. Day = first work-day after due in
 - 2. Time = 0800 hours
- G. Estimated Run Time:** 30 minutes
- H. Usual Priority Status:** Routine
- I. Security Classification:** Unclassified
- J. Distribution:** TECH Library

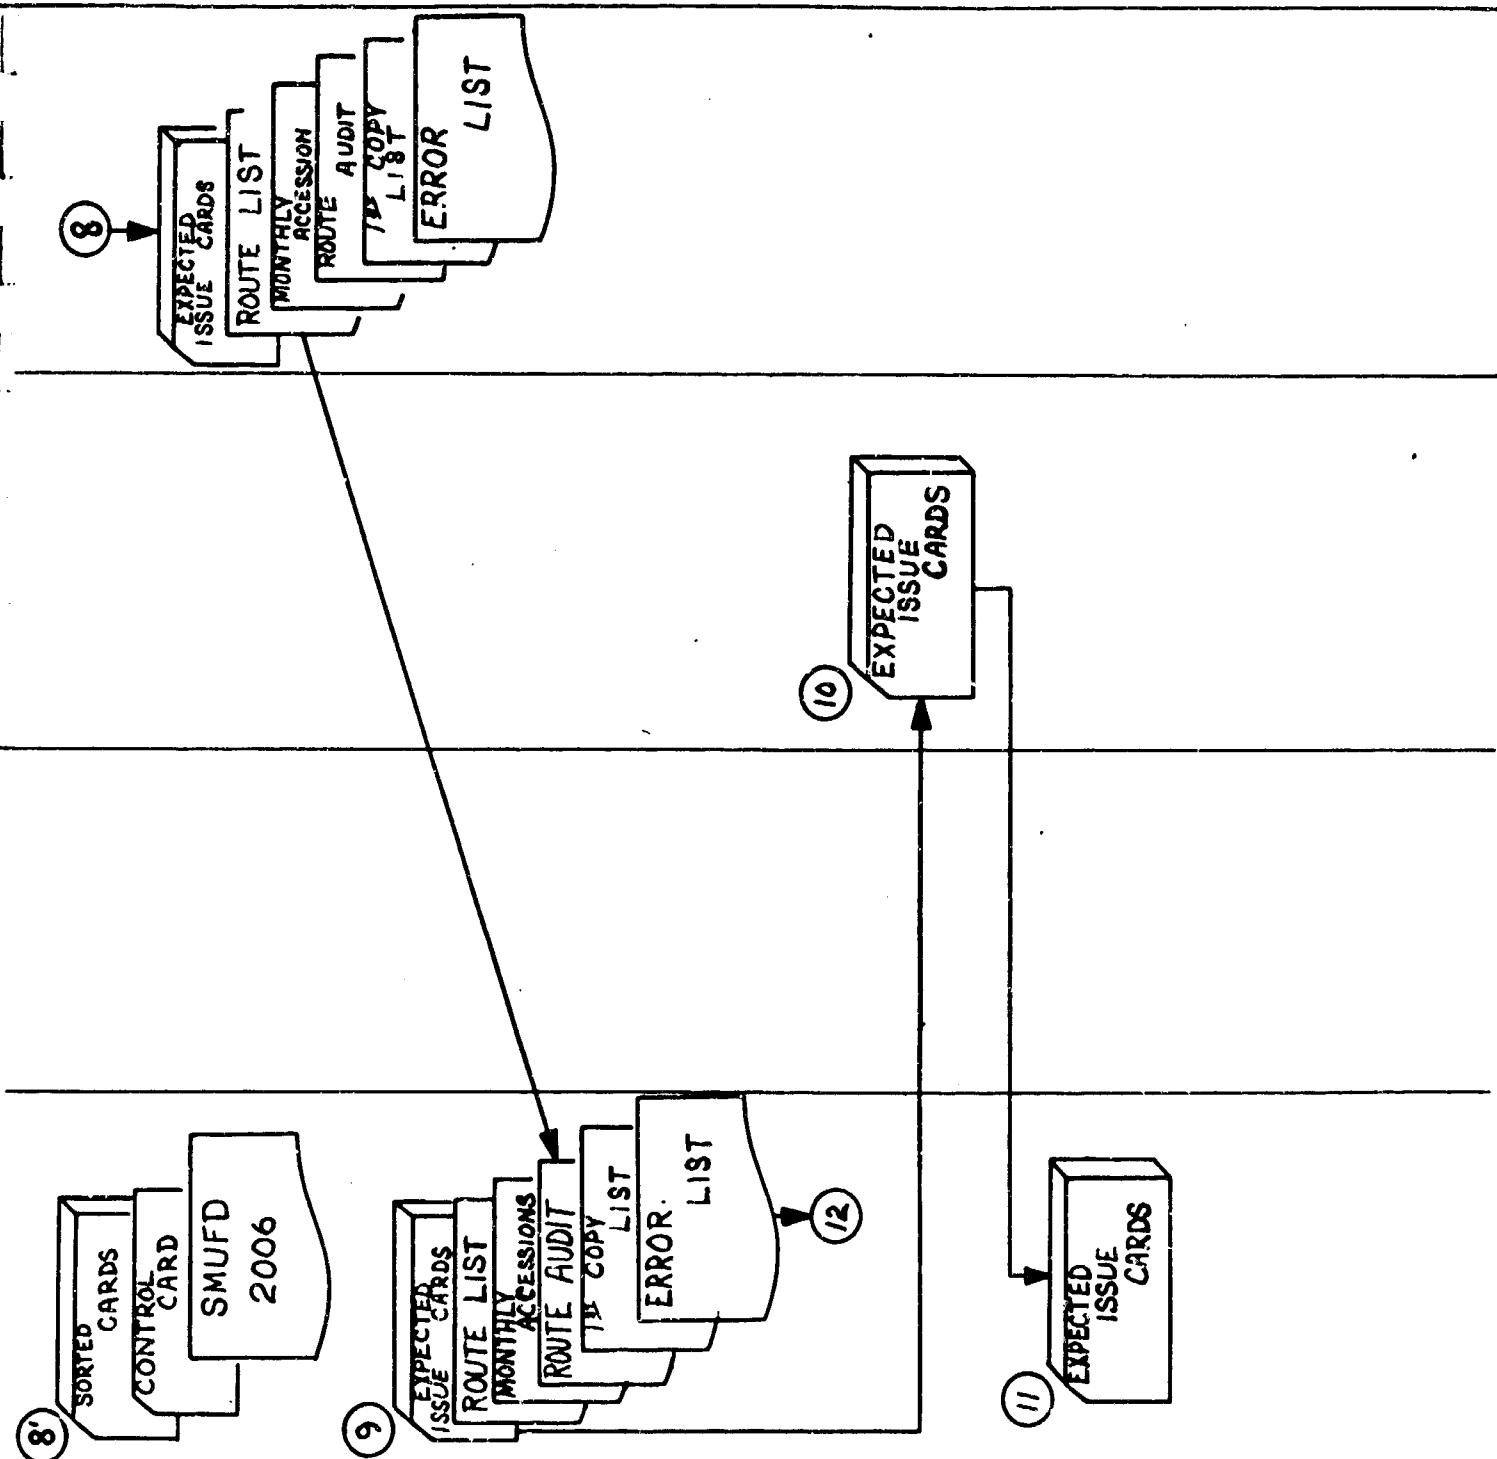

II. OPERATING PROCEDURES

<u>Area of Responsibility</u>	<u>Action</u>
Control	1. a. Log in DD 1530 Transcription sheets, Expected Issue Cards b. Prepare key Punch instructions W/O--if required c. Forward DD 1530 with instructions to Key Punch
Key Punch	2. a. Punch data per instructions b. Return DD 1530 to Control c. Return cards to Control
Control	3. a. File DD 1530's b. Combine cards from Library and Key Punch, Prepare Sort instructions c. Forward to EAM
EAM	4. a. Sort Col. (N) 80 b. Select 1, 9 cards--Maintain Sort Integrity of other cards c. Sort 1 cards Col. (N) 69-62 d. Sort 9 cards on Col. (N) 9-7 e. Combine 1 and 9 cards in correct sequence with nonselect deck in step a f. Sort 5-1 g. Return to control

<u>Area of Responsibility</u>		<u>Action</u>
Control	6.	<ul style="list-style-type: none"> a. Prepare SMUFD Form 2006 b. Prepare Data card giving price and current month data c. Forward Data deck with 2006 to Computer
Computer	7.	<ul style="list-style-type: none"> a. Process SLS01 as indicated on 2006 b. Return Input to Control c. Forward Expected Issue Cards to Control d. Forward Listing to Control
Control	8.	<ul style="list-style-type: none"> a. File Input in 60-Day Retention File b. Prepare Interpret instructions Forward with Expected Issue to EAM c. Decolate Burst listings
EAM	9.	<ul style="list-style-type: none"> a. Interpret Expected Issue Card b. Return to control
Control	10.	<ul style="list-style-type: none"> a. Forward Listings and cards to Library

WORK FLOW: SLS01 - SERIAL LIBRARY UPDATE

8. Run program SLS01.
Output EXPECTED ISSUE CARDS and four copies of each listing.
9. Forward input and operator instructions to CONTROL.
10. Forward EXPECTED ISSUE CARDS to EAM for interpretation of Col.1-5 of 6-58 upper line
62-65
66-69 lower line
11. Return interpreted cards to CONTROL.
12. Burst listings.
Forward listings and EXPECTED ISSUE CARDS to TECHNICAL LIBRARY.

CAUSE/CORRECTIVE ACTION

- 01 Remove Master tapes SLS01MST from LU04 and SLS01ROT from LU06. Mount Master Tape SLS01ACC on LU05 and a scratch tape labeled SLS01ACC with today's date on LU07.
- 02 Remove Master Input SLS01ACC from LU05, Mount scratch tape labeled with today's date on LU04.
- 03 Remove Master Output Tape SLS01MST from LU04.
05 Remove Master Output Tape SLS01ACC from LU07. Mount scratch tape labeled SLS01ROT with today's date on LU06.
- 06 Remove Master Output Tape SLS01ROT from LU06. Load printer with 5x8 continuous card stock.

OPERATOR COMMENTS:

PROGRAM TITLE: Accession List (Selective) (SLS02)

PROGRAM OBJECTIVE:

The program objective is to list all journal titles with cross reference information and the volume/issue number of copies received, depending on the control data.

PROGRAM DESCRIPTIONS

If control card "ALL" is read, list the title of the journal, then list the volume/issue number and cross reference issue hold data for each issue on file. On change of journal, print next-title, etc.

If control is "FIRST", print the title of a journal and the volume/issue numbers of the first and last issue received.

**PROGRAM TITLE: SERIAL LIBRARY MANAGEMENT REVIEW REPORTS
(SLS03)**

PROGRAM OBJECTIVE:

To selectively list suppliers and the journals for which they are the source. The list will reflect title, number of copies, unit cost and total cost for each journal.

PROGRAM DESCRIPTION:

Header cards indicating title of run and suppliers are read one at a time. The master tape is searched for journals furnished by the selected supplier, as a record is found it is printed at the end of the Master Tape; another card is read for the name of the next report/supplier.

d.		
10. DISTRIBUTION STATEMENT Distribution of this document is unlimited.		
11. SUPPLEMENTARY NOTES Supersedes AD 621 067	12. SPONSORING MILITARY ACTIVITY Department of Army Fort Detrick Frederick, Maryland 21701	
13. ABSTRACT The Serial Library System (Journal Control) maintains scientific and technical journal records of the Fort Detrick Technical Library. These records have been automated to facilitate the production of receiving reports, accession lists, routing lists, and management review of subscription contracts. The programs revise those reported in AD-621 067 and are written in COBOL for a CDC 3150 computer with disc drives.
